EXPERIENCE

PEACE GREEKS - APP CONTENT EDITOR   2022.9 - 2023.3

- Edited content for the Korean version of the Arrival Advisor app
- Utilized Markdown to structure and format text efficiently

PROJECTS

STUFF N STUFF – SECOND-HAND MARKETPLACE WEB APP (SCHOOL GROUP PROJECT)   2024.5
Tech: EJS, Express.js, TypeScript, PostgreSQL, Azure Blob Storage, JWT, Web Sockets

- Led the project as Project Manager, managing project timelines.
- Developed a personalized recommendation system that suggests items based on users' viewed posts.
- Integrated secure image storage using Azure Blob Storage for shared user content.

BEEP – WOMEN'S SAFETY MOBILE APP (SCHOOL GROUP PROJECT)   2024.9 - 2024.12
Tech: TypeScript, React Native, Expo, Tailwind CSS, Docker, AWS Lambda, Google Maps API

- Implemented real-time location sharing via notifications, camera, and SMS using React Native and Expo APIs.
- Effectively managed time to ensure on-time project completion.
- Developed alternative solutions to overcome technical challenges.
- Achieved 3rd place in 10 teams in the final project showcase.

FOUR SEASON – SEASONAL GEAR RENTAL WEB APP (CLIENT PROJECT)   2024.12
Tech: Next.js, React, TypeScript, React-Email (Resend), Strapi, PostgreSQL

- Designed a fully responsive web app for gear rentals and trip planning in Vancouver.
- Implemented real-time booking and reservation management.
- Developed an automated email confirmation system for a seamless user experience.

CHEZ MARI SALON – WEBSITE REDESIGN WITH CMS (CLIENT PROJECT)   2025.01 - 2025.03
Tech: WordPress, Tailwind CSS, WordPress Plugins

- Developed a CMS-based website to allow the client to manage content independently.
- Redesigned the website with an improved reservation system and modern UI/UX.
- Served as Project Manager, providing weekly updates and incorporating client feedback to align with expectations.

IMDB CLONE – MOVIE INFORMATION WEB APP (PERSONAL PROJECT)   2025.02 - 2025.03
Tech: ASP.NET MVC, C#, Bootstrap, .NET, CSS, MySQL

- Developed a responsive IMDb-like web app with authentication and a community commenting system.
- Integrated OMDb, TMDb, and News APIs for real-time movie information.
- Used MySQL for authentication and community interactions while handling movie data via APIs.
